

America's Cooperative Electric Utilities The Nation's Consumer Owned Electric Utility Network

Key Highlights

- Electric cooperatives are an integral part of the \$485 billion U.S. electric utility industry. They play a critical role in our nation's economy and in local communities.
- This fact sheet provides stats and information on the operation and contributions of rural electric cooperatives.

Electric Cooperatives Are:

- Private, independent, non-profit electric utility businesses
- Owned by the customers they serve
- Incorporated under the laws of the states in which they operate
- Established to provide at-cost electric service
- Governed by a board of directors elected from the membership which sets policies and procedures that are implemented by the cooperatives' management

Distribution cooperatives are the foundation of the electric cooperative network. They are the direct point of contact with the member-owners in the delivery of electricity and other services.

Generation & Transmission cooperatives (G&Ts) provide wholesale power to distribution co-ops through their own generation or by purchasing power on behalf of the distribution members.

In addition to providing high-quality electric service, electric cooperatives are deeply committed to their communities. They empower members to improve the quality of their lives through economic development and revitalization projects, job creation, improvement of water and sewer systems, and assistance in delivery of health care and educational services.

Facts at a Glance:

- 832 distribution and 64 G&T cooperatives, a total of 896 NRECA co-op members
- Serve an estimated 42 million people in 48 states
- Over 22 million businesses, homes, schools, churches, farms, irrigation systems, and other establishments in more than 2,500 of 3,141 counties in the U.S.
- 13 percent of the nation's electric customers are served by electric co-ops
- Co-ops added over 400,000 new consumers in 2022

To Perform Their Mission, Electric Cooperatives⁴:

- Own assets worth over \$213 billion (distribution and G&T co-ops combined)
- Have equity over \$75 billion (distribution and G&T co-ops combined)
- Own and maintain 2.7 million miles, or 42%, of the nation’s electric distribution lines
- Deliver 13 percent of the total kilowatt-hours sold in the U.S. each year
- Generate 5 percent of the total electricity produced in the U.S. each year
- Employ over 73,000 people in the U.S.
- Retire over \$1.3 billion in capital credits annually
- Pay \$1.5 billion in state and local taxes

Electric Utility Comparisons

Overview	<u>Cooperatives</u>	<u>Total Industry¹</u>
Total Revenue (billions).....	\$57	\$485
Number of Organizations.....	896	3,200
Number of Total Customers (millions).....	22	160
¹ including cooperatives		
Sales (billion kilowatt hours)	<u>Cooperatives</u>	<u>Total Industry¹</u>
Residential.....	261	1,553
Commercial.....	112	1,419
Industrial.....	118	1042
Total.....	491	4,020
¹ including cooperatives		
Other comparisons⁴	<u>Cooperatives</u>	<u>Rest of Industry²</u>
Share of Sales.....	12%	88%
Share of Net Generation.....	5%	95%
Miles of Distribution Line Ownership.....	42%	58%
Customers per mile of line (density).....	7.98	32.40
Revenue per mile of line.....	\$19,135	\$79,298
Revenue per Customer.....	\$2,390	\$2,585
Distribution plant per Customer.....	\$4,219	\$3,698
Equity as percent of assets.....	35%	33% ³
